Release Notes

Application: AFHCANsuite
New Version: AFHCAN v8.2.0
Release Date: 06/09/2017
Supersedes: 8.1.0

New Features

AFHCAN mPage

AFHCAN within a Cerner mPage. AFHCANweb now has the ability to be hosted inside a Cerner mPage. The first time you open the mPage you will be asked for your AFHCAN credentials to verify your access. From that point forward you will be enrolled into Single signon and will not need to supply your AFHCAN credentials when arriving from the Cerner mPage

CAMM Integration for Case exports to Cerner

In prior versions we AFHCAN has integrated with Cerner for Case exports. This integration was using a technology that migrated the case summary into JPEG format. v8.2 will now use the CAMM technology to show the Case Export in full PDF format with clickable links and full resolution images within the PDF.

Print Case Enhancement

When Printing a Case from within case options. You will notice a more complete version of the Case Summary is Printed in PDF Format.

Minimum System Requirements

Server
- If upgrading, Telehealth Consult Server software v6.3 or higher
- Microsoft Windows Server 2008 SP2, 2008 R2, 2012
- Microsoft SQL Server 2008(x86 or x64), 2012, 2014
- Microsoft .NET Framework 4.6.1
- Telehealth Consult Web requires Google Chrome, Safari on iPad, Edge with Windows 10, or Mozilla Firefox

Cart (not part of this release)
- If upgrading, Telehealth Consult Cart software v6.3 or higher
- Microsoft Windows 7 or Microsoft Windows 8 & 8.1
- Microsoft .NET Framework 4.6.1

Mobile (not part of this release)
- iOS 7-10 on iPhone & iPad
- Android Jelly Bean, KitKat, Lollipop, Marshmallow

Compatibility
Server Manager and all Organizations managed by that instance of Server Manager must all be at the same version of Telehealth Consult if your installation utilizes AD integration. This affects the AD Mapper Tool as well as any AD scheduled tasks.
